Why have we changed for most our seed raised lines to the "360" Challenger Tray?

"Our main supplier of Seed Raised products for this year is Young Plants Ltd.They are introducing the new "Challenger "tray.Challenger has a flat full footprint 360 cell.Challenger is made from vacuum formed plastic and is treated with a non stick coating to make plug extraction easier.Its 15 x 24cell layout makes it compatible with all transplanters.The tray is engineered to cut down on the gapping between cells which results in a large plug measuring 20mm with a voloume of 6cc which is virtually the size of the existing 264 plug.

The advantage of this is that it benefits you with a shorter production time and a greater developed plug without comprimising planter efficiencies by providing you with a higher tray count which also contributes to a more cost effective distribution.The Challenger also stacks beautifully into itself, addressing the long standing frustrationof tray storage and returns".
